

# SHARVIL BIDKAR

Frontend Engineer · React.js · TypeScript · Dashboard & Data-Heavy Applications  
Pune, India | +91-9139379638 | sharvilbidkar5@gmail.com | linkedin.com/in/sharvil-bidkar-259754217

## PROFESSIONAL SUMMARY

React.js Frontend Engineer with 4+ years of experience building enterprise-grade, data-heavy applications — including real-time analytics dashboards, virtualized data grids, and complex reporting UIs. Strong track record at SLK Software delivering measurable impact: 30% reduction in duplicate UI code, 20%+ performance gains via code splitting and lazy loading, and workforce analytics tools tracking 100+ employees. Proficient in TypeScript, Redux, REST API integration, Azure AD auth, and Agile delivery.

## TECHNICAL SKILLS

|                |                                                                              |
|----------------|------------------------------------------------------------------------------|
| Core Frontend  | React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Next.js                |
| UI & Styling   | Material UI (MUI), Ant Design, Bootstrap, Responsive Design,                 |
| Charts & Grids | Recharts, Chart.js, AG Grid, Data Tables, Custom Dashboards                  |
| State Mgmt     | Redux, Context API, React Hooks, Component Architecture                      |
| API & Auth     | REST APIs, Axios, JSON, Azure AD (MSAL), Role-Based Authorization, GraphQL   |
| Backend Touch  | .NET MVC (Controllers, API debugging), Node.js, SQL Server, Entity Framework |
| Dev & DevOps   | Git, Azure DevOps, Docker, CI/CD Pipelines, Webpack, Babel, ESLint, Vite     |
| Performance    | Lazy Loading, Code Splitting, Bundle Optimization, Webpack Tuning, Debugging |
| AI Dev Tools   | GitHub Copilot, Cursor AI, Claude                                            |
| Testing Lib    | Unit testing, React Testing Library, Jest, Cross Browser Testing             |

## WORK EXPERIENCE

### Software Engineer (Frontend) | SLK Software Services Pvt. Ltd. | Pune Jul 2022 – Present

- Architected and delivered 4+ enterprise React.js modules integrated with .NET MVC backend, supporting finance, workforce, and analytics workflows used by large-scale enterprise clients.
- Built a reusable component library (React + MUI + Ant Design) that eliminated ~30% of duplicate UI code across teams, improving delivery consistency and onboarding speed.
- Implemented lazy loading and code splitting strategies (Webpack), improving page load performance by 20%+ and reducing initial bundle size across high-traffic enterprise dashboards.
- Integrated Azure AD (MSAL) for secure authentication and role-based access control (RBAC) across multi-user enterprise applications.
- Designed and maintained REST API integration layer using Axios, enabling seamless client-server communication across multiple modules.
- Led refactoring of legacy UI modules: replaced hard-coded logic with reusable template patterns, improving maintainability and reducing dev cycle time.
- Delivered workforce optimization solution that improved resource allocation visibility for 100+ employees — recognized with Stellar Team Award.
- Collaborated daily with QA, BA, DB, and UX teams in Agile sprints using Azure DevOps boards and CI/CD pipelines.
- Leveraged GitHub Copilot and Cursor AI daily (1.5+ years) to accelerate development velocity — reducing boilerplate writing time, enabling faster iteration, and maintaining focus on architecture, logic, and code quality.

## KEY PROJECTS

---

### **Agile DMP – Enterprise Analytics Platform** — *React.js · MUI · REST APIs · Azure DevOps*

- Built multi-module analytics dashboard covering finance, resource utilization, and workforce KPIs for enterprise stakeholders.
- Developed WFO/WFH attendance tracking module with real-time data visualizations; used by HR to track 100+ employees.
- Modernized legacy UI from jQuery/Razor to React component architecture, cutting page load time and improving UX significantly.

### **Voya Bank – Real-Time Enterprise Dashboard (USA Client)** — *React.js · TypeScript · Recharts · .NET MVC*

- Built real-time project tracking and system monitoring dashboards for a US banking client, enabling operations teams to monitor error rates, throughput, and SLA compliance.
- Designed scalable, component-driven UI architecture in React + TypeScript that reduced redundant renders and supported easy feature additions.
- Improved application performance and cross-browser usability across enterprise workflows handling large data sets.

### **Career Edge – Career Development Platform** — *React.js · Context API · REST APIs*

- Enhanced career planning, goal-setting, and mentorship modules with improved state management and API integration.
- Optimized frontend performance and responsiveness, improving page interaction speeds for end users.

### **Interview Tracker Pro – Personal Project** — *React.js · TypeScript · Tailwind CSS · Supabase · Vite* | [Live Demo](#)

- Built a full-stack job search analytics dashboard from scratch using React, Tailwind CSS, Vite, and Supabase (PostgreSQL + Auth) — tracking applications, interview stages, and progress metrics in real time.
- Designed and implemented analytics views (status breakdowns, funnel tracking, timeline charts) demonstrating end-to-end ownership of a data-driven React application.
- Integrated Supabase for backend (real-time database, row-level security, user authentication) — demonstrating full-stack capability beyond pure frontend roles.

## EDUCATION

---

### **Bachelor of Computer Science (BCS)**

June 2020

Y.C.I.S. College of Science, Satara | Shivaji University

## CERTIFICATIONS & ACHIEVEMENTS

---

- Azure DevOps — Udemy
- Azure Fundamentals — Udemy
- Stellar Team Award — Recognized for ownership, consistent delivery, and cross-functional collaboration at SLK Software
